

# Signs

In any industrial workplace busy pedestrian areas are always important as they usually carry safety warnings and instructions, especially where there is segregation between traffic and pedestrians which carry their own dangers. A-Safe can create integrated signboards for our safety barrier systems; the most common being Handrails, Pedestrian Barrier and Traffic Barrier Plus. Upright arms can carry any type of signage. Our signboards come in three standard sizes, but we are capable of providing size solutions to your signage issues. Our signs can also be fitted retrospectively if you have barrier sets with rails. You can also buy a small rail set with upright arms to have a stand-alone sign system.

## Applications and Benefits

Our signs are useful any where there is a need for safety signs for warning and instruction. Some signs need to be compulsory displayed and A-Safe can provide these, particularly near busy entrance ways adjacent to traffic, crossing points for pedestrians and at any point where there is a need.

### Health and Safety Did You Know

- They require, where necessary, the use of road traffic signs within workplaces to regulate road traffic.
- They also require employers to maintain the safety signs which are provided by them.

*HSE Signpost to The Health and Safety (Safety Signs and Signals) Regulations 1996.*

### Customer Endorsement

**BOSCH**  
Invented for life

“We are also pleased with the ease in which to fix display signage panels, A-Safe signs fit easily, being neat and tidy and the whole is very cost effective”

*Jon Greville, Warehouse Manager for Bosch*

### Technical Did You Know

- Can be retro fitted to existing handrails
- Comes in three standard sizes
