

A-SAFE

Car Stops

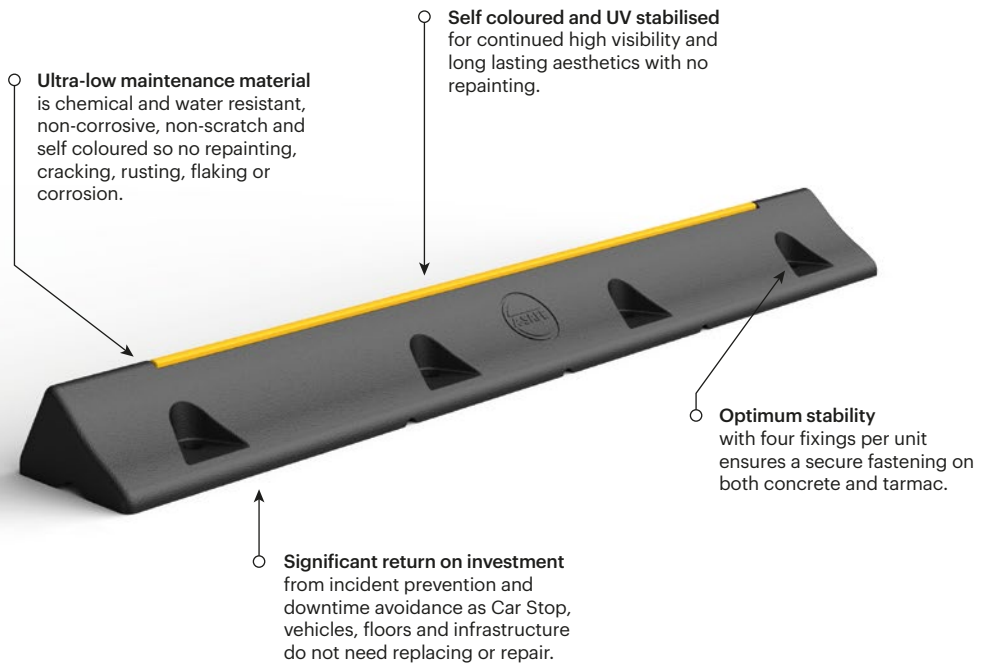

Designed for use with low-set vehicles such as cars and some delivery trucks, so they don't impact with the vehicle bumper, Car Stops are ideal for car parks and facilities with busy foot traffic. They help to define parking bays and act as a barrier to pedestrian walkways.

Manufactured from high performance recycled rubber, Car Stops are weather and crack resistant, and maintain their form under pressure, restraining vehicles, preventing movement and avoiding danger from vehicles drifting from designated locations.

High visibility markings mean the Car Stops can be easily seen by both drivers and pedestrians.
