

A-SAFE

Universal Swing Gate

The Universal Swing Gate completes a fully protected and controlled walkway system. Preventing severe injury from workplace vehicles whilst providing excellent return on investment through employee downtime.

The sleeve design and self-closing mechanism ensures a range of walkway opening sizes can be secured using a single boxed product, whilst a simple installation process allows the gate to be mounted to both A-SAFE posts and both internal and external walls.

The Universal Swing Gate creates suitable access points to help maintain workplace safety, forcing employees to pause and check for hazards before crossing.

Compliant to the
global benchmark
in barrier safety

bsi. PAS 13
Code of Practice for
Workplace Safety
Barriers

Engineered for performance

Self-coloured and UV stabilised for continued visibility and long-lasting aesthetics with no repainting.

Dedicated signage area

Ergonomic design with no sharp edges.

Food safe, wipe-clean, water resistant surface

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self-coloured so no repainting, rusting, flaking or corrosion.

Advanced strength polymer blended for unequalled strength and flexibility.

Drop & lock system x6 hooks on the front face of both post & wall adaptor

Gate Fixings

130 OD - No sleeve required

Patented fixing straps

Varying lengths to fit any facility. The Universal Swing Gate has a 2 part sleeve system which allows the gate to adapt to various openings from 800-1200mm.

Self-close hinge allows the swing gate to self close to the standard A-SAFE gate stop. This ensures pedestrian walkways and crossings are closed and makes the pedestrian take time to be aware of surroundings before passing through the gate.
