

Engineered for performance

Memaplex™ advanced strength polymer created from an exclusive composition of the most sophisticated polyolefins and rubber additives, expertly blended for unequalled strength and flexibility.

Unrivalled recovery through a unique built-in memory that allows the guardrail to flex, cushion and reform repeatedly upon impact, saving vast amounts in guardrail and vehicle repairs.

Huge return on investment from incident prevention and downtime avoidance as rails, vehicles, floors and infrastructure do not need replacing or repair.

Rotating wear collars deflect force from repeat glancing blows preventing expensive on-going maintenance costs.

Self colored and UV stabilized for continued high visibility and long lasting aesthetics with no repainting.

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self colored so no repainting, rusting, flaking or corrosion.

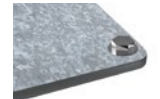

Environmentally friendly and 100% recyclable.

Zinc nickel, electrophoretic coating on base plates as standard, provides advanced protection against corrosion damage.
