

## StepBumper

The StepBumper offers unprecedented heavy-duty low-level protection that prevents injuries and damage in vehicle charging areas, goods holding areas and pedestrian walkways.

The dangers in these areas of the workplace can lead to pedestrian injuries, damaged infrastructure and costly downtime.

Unrivalled recovery through a unique built-in memory that allows the StepBumper to repeatedly flex, cushion and reform upon impact.

Significant return on investment through incident prevention and downtime avoidance, as bumpers do not require replacement or repair.

## Available sizes (inches)

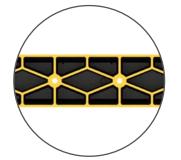

## Features and benefits

The twin layered Monoplex product offers a softer upper layer which dissipates energy whilst the lower harder layer provides rigidity around the fixing holes. This ensures the StepBumper remains strong under impact and distributes energy across the product, reducing the risk of damage and minimizes the risk of fixings pulling out of the ground.

Monoplex is a new material innovation that is revolutionising impact protection in industrial workplaces worldwide. Precision-engineered and produced in the UK using state-of-the-art materials and manufacturing technology, Monoplex safety products offer unprecedented levels of versatility, durability, and performance across multiple impacts.

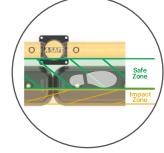

Recessed fixings ensure low centre of gravity and minimal

loading to floor

Monoplex construction for maximum flexibility and scuff-resistance

Heavy duty vehicles operating within shared workspaces such as charging points require products which can withstand high impacts. The supporting internal rib structure provides strength throughout the product to ensure the StepBumper doesn't crumple under impact and can return to its original form.

<sup>b</sup> Ergonomic design

with no sharp edges

This illustration shows a Safe Zone created by the rigidity of the StepBumper. In the eventuality that a vehicle continues to move after the driver has dismounted.

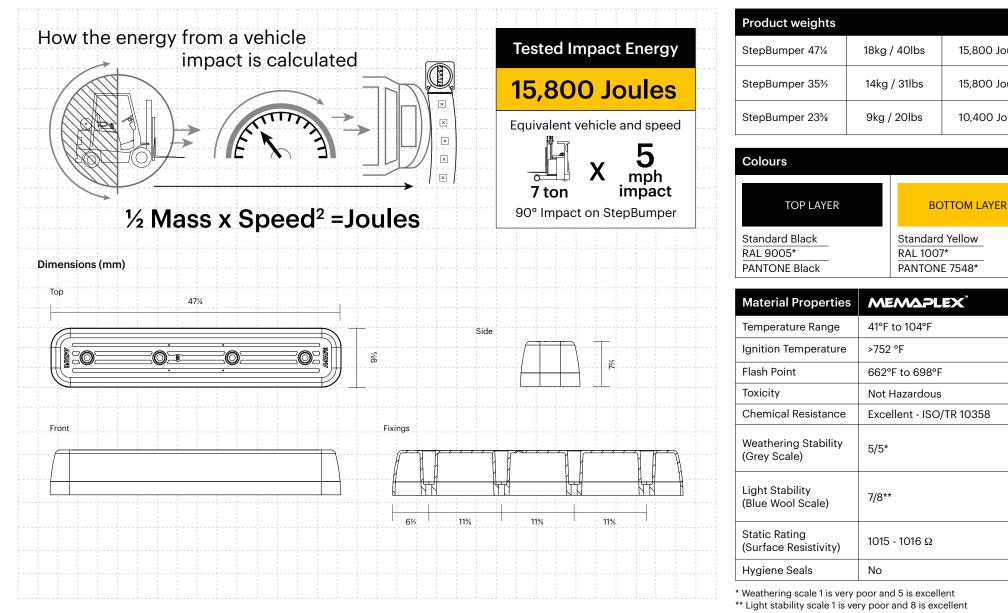

<sup>d</sup> Hygienic, wipe

resistant

clean and water

The StepBumper is easy to install with a maximum of 4 x M16 – OD24mm Bolt Type Head fixings (1200mm version) per StepBumper. This means that the product can be installed or replaced quickly with a minimum amount of disruption on site.
